2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The consolidated financial statements for AsiaFIN Holdings Corp. and its subsidiaries for the six months ended February 28, 2021 are prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”) and include the accounts of AsiaFIN Holdings Corp. and its wholly owned subsidiaries, AsiaFIN Holdings Corp. and AsiaFIN Holdings Limited. Intercompany accounts and transactions have been eliminated on consolidation. The Company has adopted August 31 as its fiscal year end.

Basis of consolidation

The condensed consolidated financial statements include the accounts of the Company and its subsidiaries. All inter-company accounts and transactions have been eliminated upon consolidation.

Use of estimates

Management uses estimates and assumptions in preparing these financial statements in accordance with US GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities in the balance sheets, and the reported revenue and expenses during the periods reported. Actual results may differ from these estimates.

Cash and cash equivalents

Cash and cash equivalents are carried at cost and represent cash on hand, demand deposits placed with banks or other financial institutions and all highly liquid investments with an original maturity of three months or less as of the purchase date of such investments.

Income taxes

Income taxes are determined in accordance with the provisions of ASC Topic 740, “*Income Taxes*” (“ASC Topic 740”). Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted income tax rates expected to apply to taxable income in the periods in which those temporary differences are expected to be recovered or settled. Any effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

ASC 740 prescribes a comprehensive model for how companies should recognize, measure, present, and disclose in their financial statements uncertain tax positions taken or expected to be taken on a tax return. Under ASC 740, tax positions must initially be recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions must initially and subsequently be measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and relevant facts.

Going Concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. As reflected in the accompanying financial statements, for the period ended February 28, 2021, the Company suffered net loss of USD150,774 and had negative operating cash flow of USD125,183. These factors raise substantial doubt about the Company’s ability to continue as a going concern within one year of the date that the financial statements are issued. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

The Company’s ability to continue as a going concern is dependent upon improving its profitability and the continuing financial support from its shareholders. Management believes the existing shareholders or external financing will provide the additional cash to meet the Company’s obligations as they become due. No assurance can be given that any future financing, if needed, will be available or, if available, that it will be on terms that are satisfactory to the Company. Even if the Company is able to obtain additional financing, if needed, it may contain undue restrictions on its operations, in the case of debt financing, or cause substantial dilution for its stockholders, in the case of equity financing.

Net loss per share

The Company calculates net income/(loss) per share in accordance with ASC Topic 260, “*Earnings per Share*.” Basic loss per share is computed by dividing the net loss by the weighted-average number of common shares outstanding during the period. Diluted income per share is computed similar to basic loss per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common stock equivalents had been issued and if the additional common shares were dilutive.

Foreign currencies translation

The reporting currency of the Company and its subsidiaries in Labuan and Hong Kong is United States Dollars (“US\$”) which being the primary currency of the economic environment in which these entities operate.

Transactions denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transaction. Monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency using the applicable exchange rates at the balance sheet dates. The resulting exchange differences are recorded in the statements of operations.

Translation of amounts from RM into US\$1 and HK\$ into US\$1 has been made at the following exchange rates for the respective periods:

	As of and for the period ended February 28, 2021	As of and for the period ended August 31, 2020
Period-end RM : US\$1 exchange rate	4.05	4.15
Period-average RM : US\$1 exchange rate	4.05	4.15
Period-end HK\$: US\$1 exchange rate	7.76	7.80

Related parties

Parties, which can be a corporation or individual, are considered to be related if the Company has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Fair value of financial instruments:

The carrying value of the Company’s financial instruments: cash and cash equivalents, prepayment, deposits, accounts payable and accrued liabilities approximate at their fair values because of the short-term nature of these financial instruments.

The Company also follows the guidance of the ASC Topic 820-10, “Fair Value Measurements and Disclosures” (“ASC 820-10”), with respect to financial assets and liabilities that are measured at fair value. ASC 820-10 establishes a three-tier fair value hierarchy that prioritizes the inputs used in measuring fair value as follows:

Level 1: Observable inputs such as quoted prices in active markets;

Level 2: Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Recent accounting pronouncements

The Company has reviewed all recently issued, but not yet effective, accounting pronouncements and does not believe the future adoption of any such pronouncements may be expected to cause a material impact on its financial condition or the results of its operations.

The Company evaluates the need for an allowance for doubtful accounts based upon factors surrounding the credit risk of specific customers, historical trends and other information.

(d) Exchange rate risk

The Company cannot guarantee that the current exchange rate will remain stable, therefore there is a possibility that the Company could post the same amount of income for two comparable periods and because of the fluctuating exchange rate actually post higher or lower income depending on exchange rate of RM converted to US\$ on that date. The exchange rate could fluctuate depending on changes in political and economic environments without notice.
